

THE COMPLETE SACCO PLATFORM

Run the whole co-operative in one place.

Members, savings, loans, guarantors, transactions, share capital, reports and access control – every module, one system, built for SACCOs.

WHAT IS BIASHARA

A SACCO management system designed for daily operations.

Biashara replaces the patchwork of spreadsheets, paper files and stand-alone apps that most SACCOs juggle. Every member, every shilling and every decision lives in a single, role-aware system.

MODULE MAP

Ten modules. One workflow.

Each tile maps to a section of the app, accessible to the right people through fine-grained roles and permissions.

**Dashboard**

Role-based metrics

**Members**

Profiles & status

**Savings**

**Transactions**

Unified ledger

**Share Capital**

Equity & dividends

**Reports**

Analytics & audits

**Data Import**

Granular per type

**Roles & Access**

Fine-grained RBAC

— MODULE 01 · DASHBOARD

The numbers that matter, on arrival.

- **Role-aware home screen**

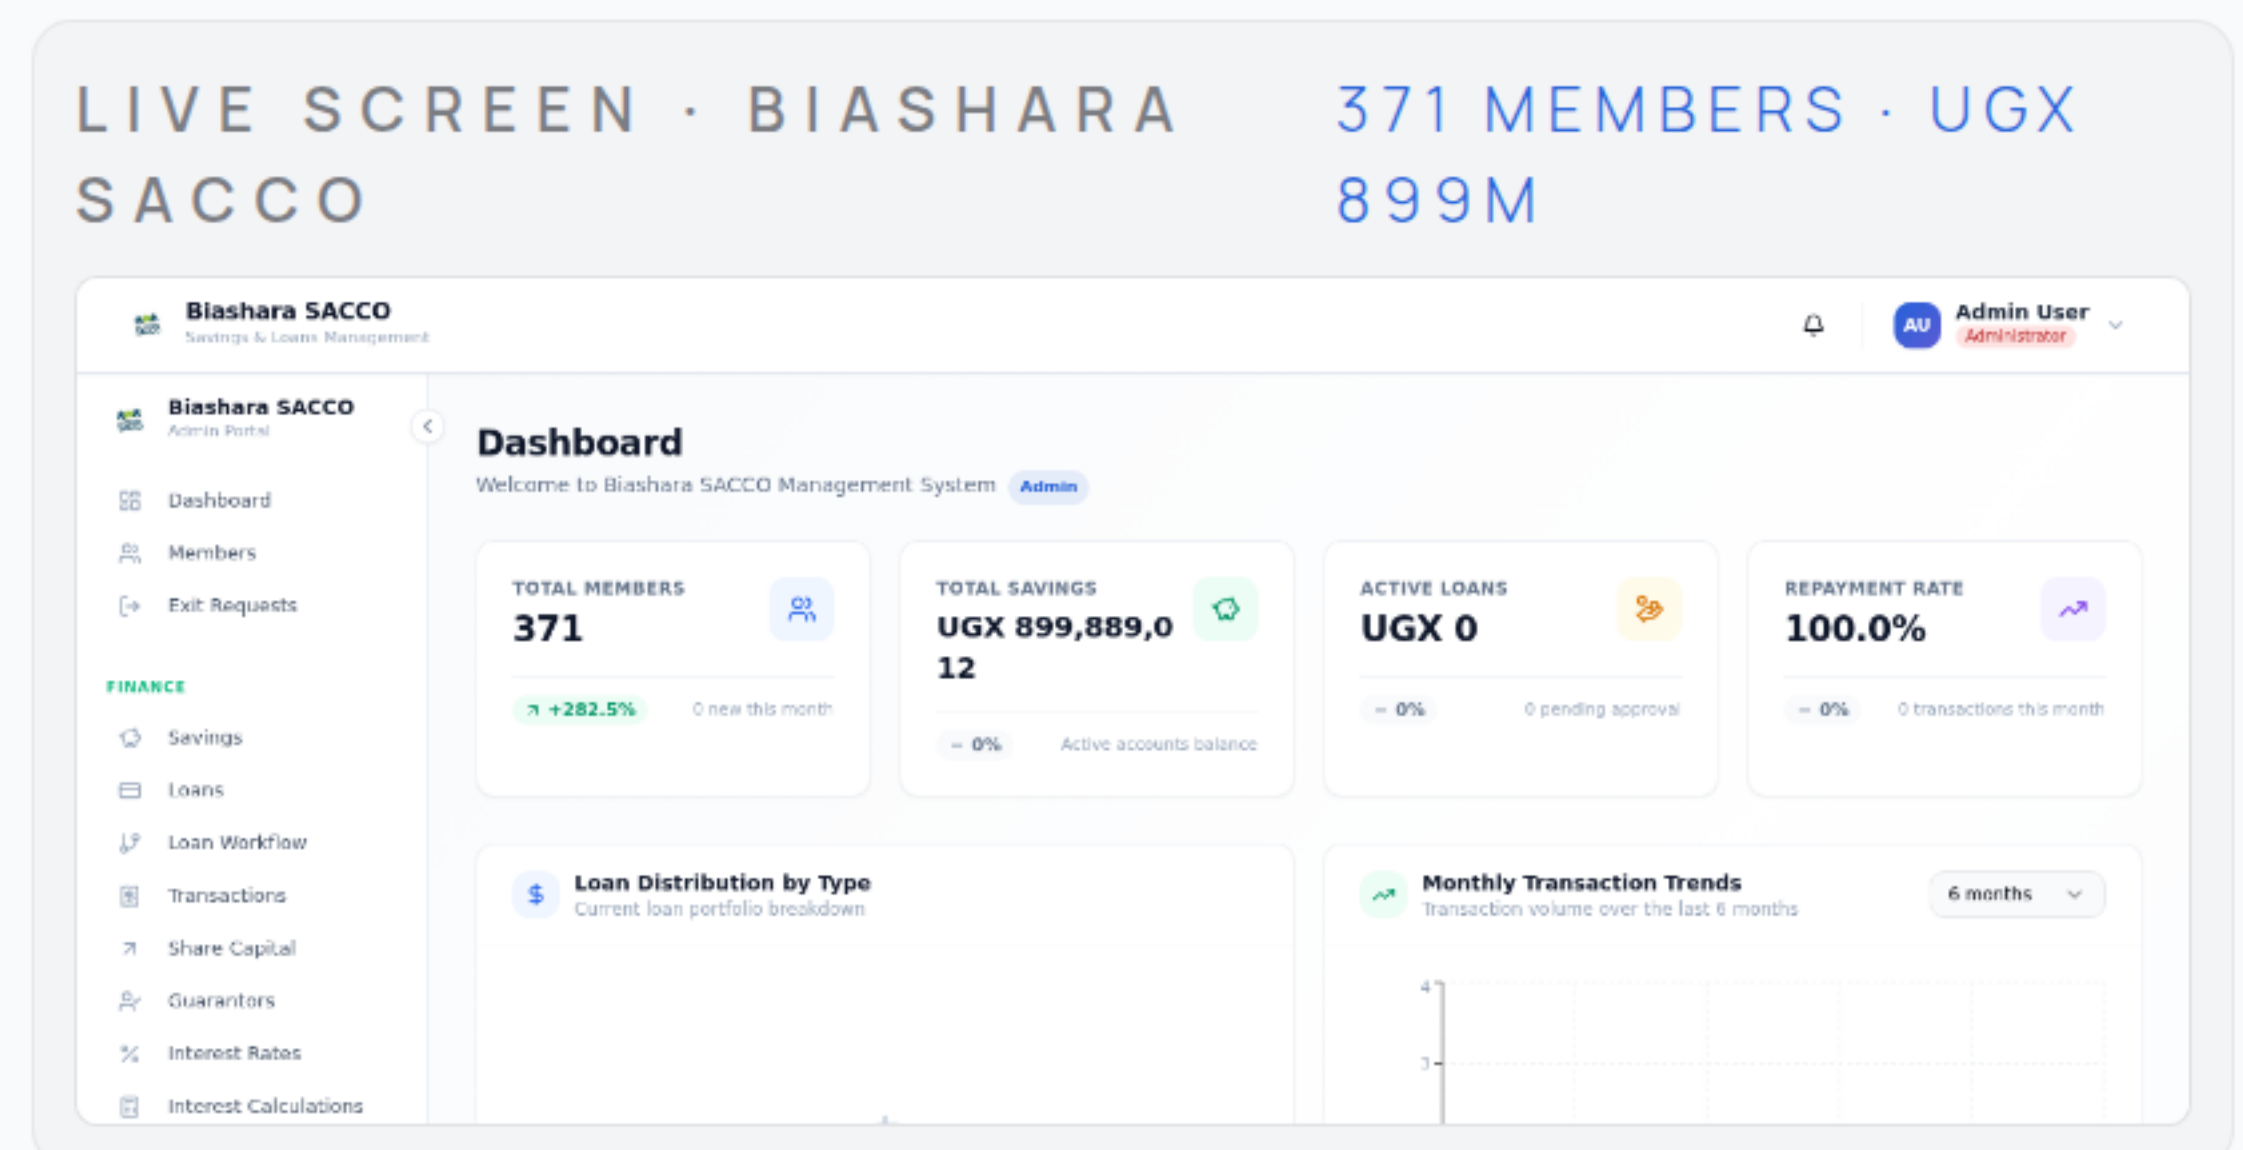

A treasurer, an admin and a member each land on a different view.

- **Live financial pulse**

Total savings, outstanding loans, share capital — refreshed in real time.

- **Quick actions**

Record a deposit, log a repayment or open a member file in one click.

— MODULE 02 · MEMBERS

The member, never a row in a spreadsheet.

- **Onboarding & profiles**

National ID, contact, department, employer — captured once, used everywhere.

- **Lifecycle status**

Pending, active, inactive, dormant — every state visible and filterable.

- **Single member view**

Savings balances, active loans, guarantor links and history in one record.

371

active members

0

pending approval

Inactive

no recent activity

Dormant

flagged for review

MODULE 03 · SAVINGS

Every shilling accounted for.

- **Deposits & withdrawals**
Recorded against the right account, with a clear running balance.
- **Account statements**
Generated on demand for any member, any date range.
- **Three account types**
Regular savings, fixed deposits and group accounts — each with its own rules.

03
Approve

04
Disburse

05
Repay

New loans, top-ups & documents

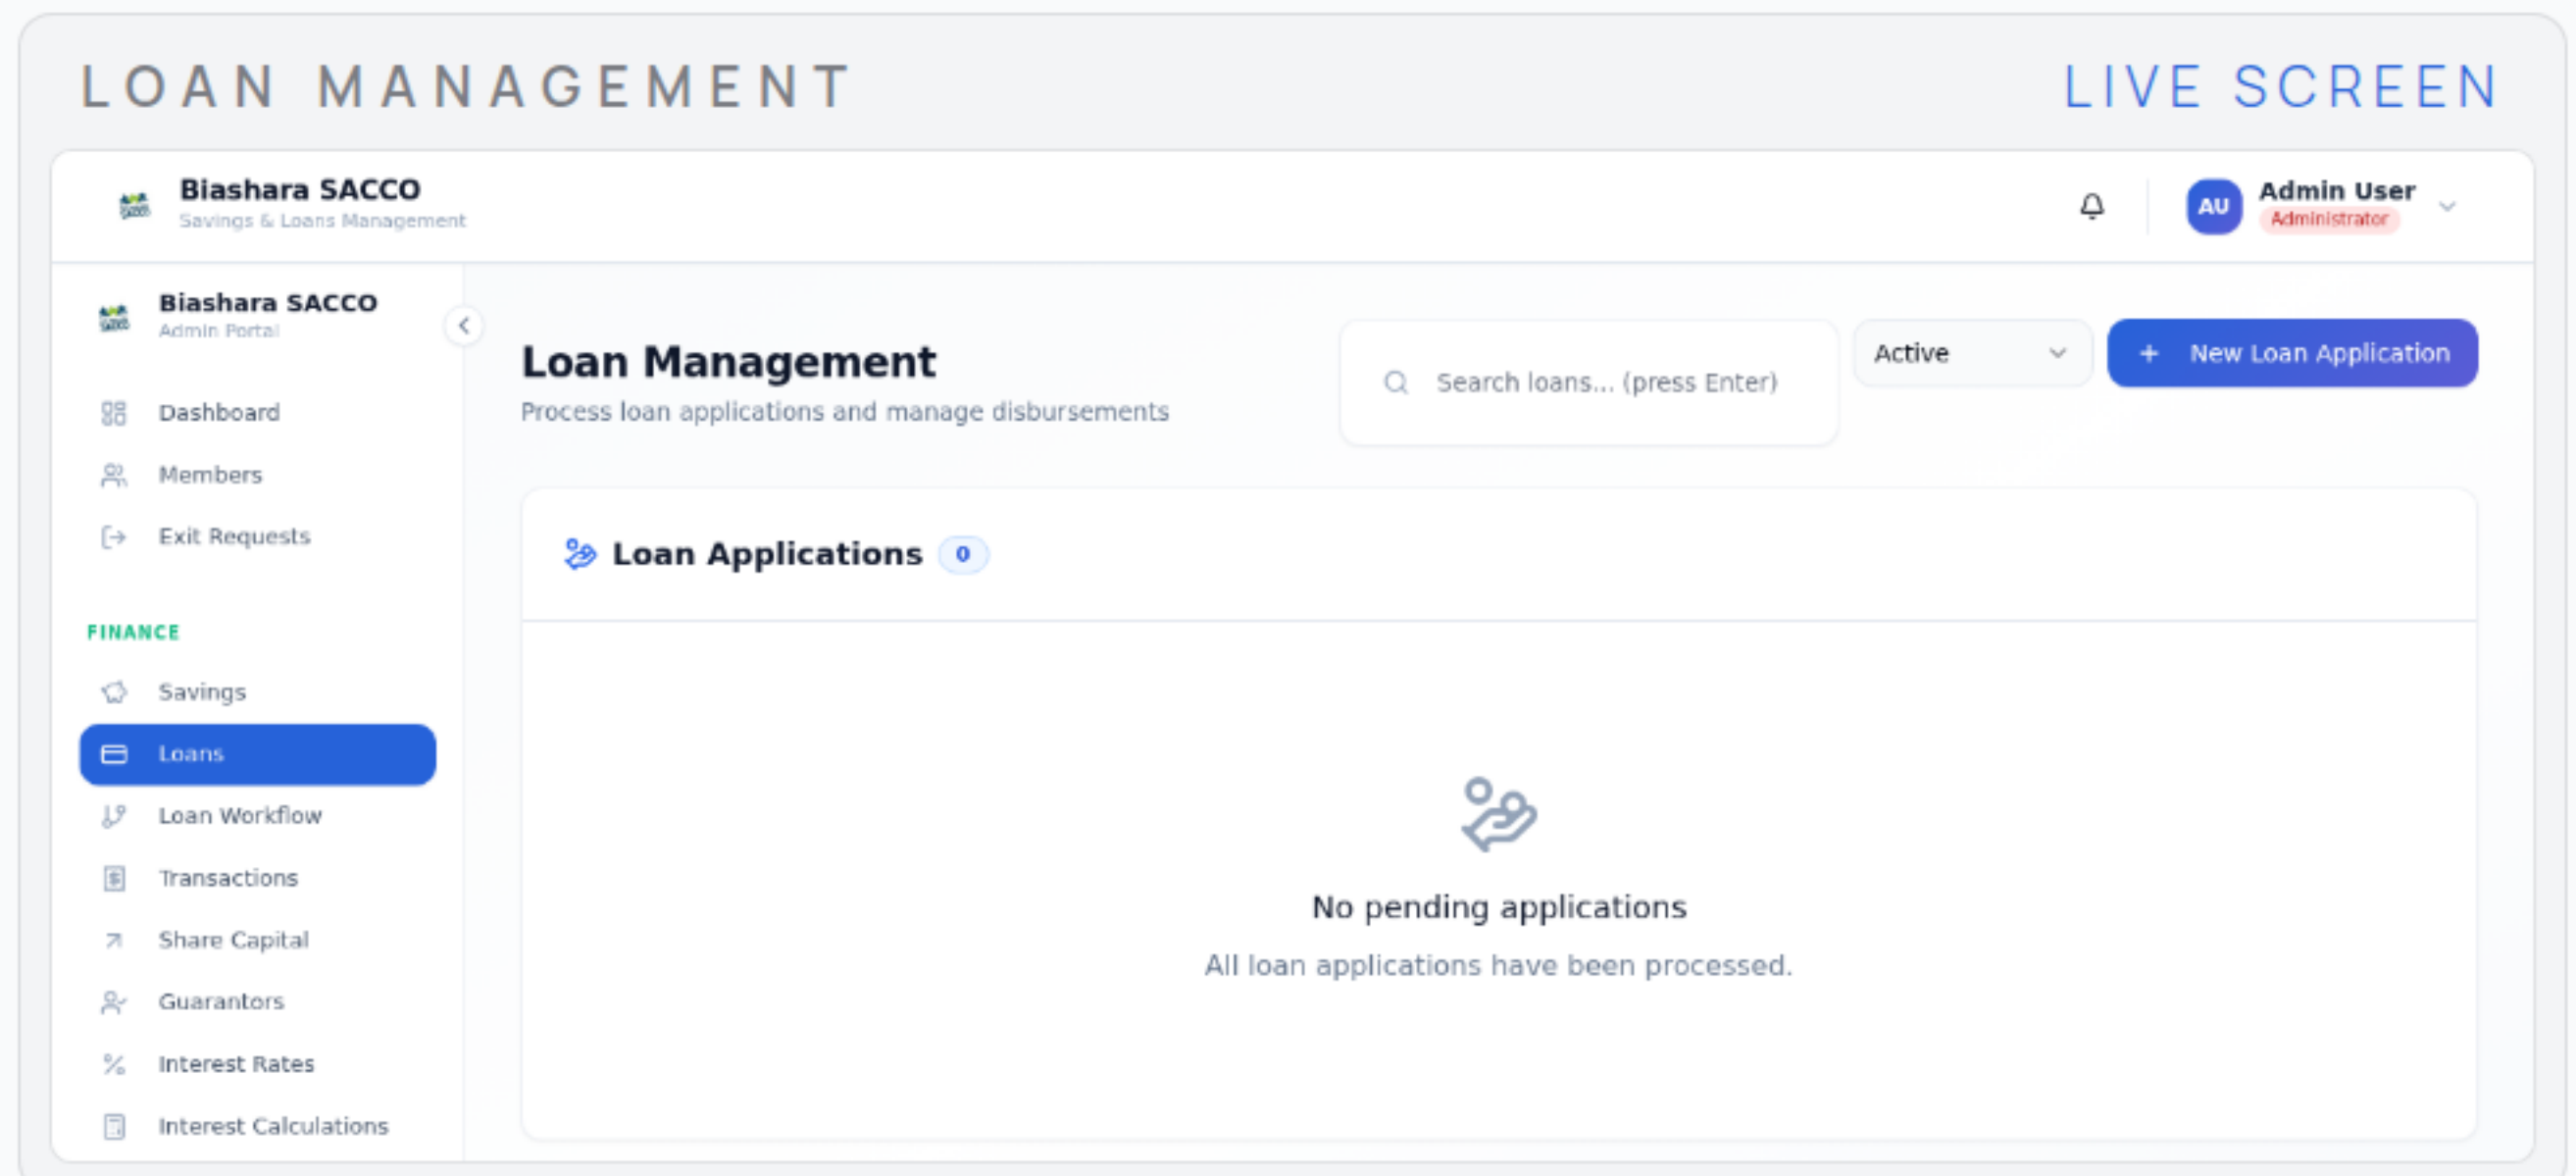

Each with its own approval path; payslips and IDs on every file.

Amortization schedules

Generated automatically for every active loan.

Live tenant: 0 active loans · 100% repayment

Members imported; loan book seeding next.

LOANS · CAPTURED FROM THE RUNNING APP

FIVE-STEP LIFECYCLE

MODULE 05 · GUARANTORS

Trust, recorded and verifiable.

- **Request & respond**

Borrowers nominate guarantors; each one accepts or declines in their own dashboard.

- **Linked to the loan file**

Status, exposure and acceptance date sit alongside the loan record.

- **Notifications, not phone calls**

In-app alerts replace the back-and-forth that used to slow approvals.

FLOW

1 Borrower nominates

2 Guarantor reviews

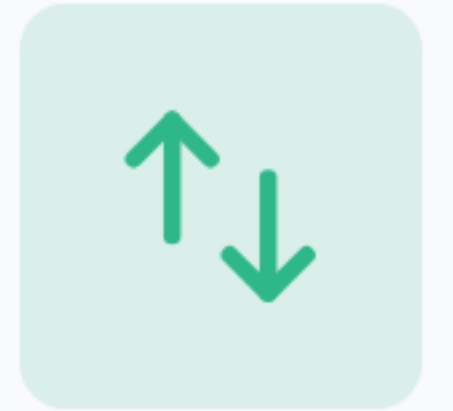

3 Accept or decline

4 Loan unlocks

Every state change is timestamped and stored in the loan's audit log.

— MODULE 06 · TRANSACTIONS

One ledger. Every movement.

- **Unified financial ledger**
Deposits, withdrawals and repayments in one feed.
- **Audit trail by default**
Actor, timestamp and source on every entry.
- **Filter, find, reconcile**
By member, by date, by type.

LIVE LEDGER

TODAY

Deposit · J. Wanjiru**+12,000**

Regular savings · 10:14

Loan #1142 · 09:48

Disbursement · F. Njoroge**+50,000**

Loan #1148 · 08:30

MODULE 07 · SHARE CAPITAL

Member equity, tracked to the cent.

- **Equity by member**

Shares purchased, transferred and held — visible per member, per period.

- **Dividend distribution**

Calculated from holdings and posted in a single, auditable run.

- **Statements on demand**

Members can see contributions and dividends in their own profile.

DIVIDEND RUN

REPORTS · CAPTURED FROM THE RUNNING APP

SIX REPORT FAMILIES

MODULE 09 · DATA IMPORT

Bring your records in, one type at a time.

**TYPE 01****Members**

Bulk member onboarding from CSV.

TYPE 02**Savings**

Account openings and balances.

TYPE 03**Loans**

Loan books with active balances.

TYPE 04**Loan repayments**

Bulk CSV repayment posting.

TYPE 05**Bulk savings**

Mass deposit posting from payroll.

Each import is its own permission.

Grant a clerk “import savings” without giving them loans.

GRANULAR RBAC

— MODULE 10 · ROLES & ACCESS

The right people see the right things.

- **Per-action permissions**

Read, create, update, delete, execute — defined per resource.

- **Custom roles**

Build a “branch officer” or “loan auditor” without code.

- **Visual role-permission matrix**

Tick the boxes; the system enforces them everywhere.
